

Bullard wildfire helmet

DESIGN AND MATERIALS

- | Helmet made of heat-resistant thermoplastic. It has a distinctive mark of three crests.
- | It has a shock-absorbing system which consists of a suspension of the 6-point crown strap that is anchored to the outer shell and distributes the energy of more than 3 cross straps that are adhered to the 6 points.
- | The helmet uses a ratchet adjustment, built in in the head band suspension system.
- | The suspension of the helmet has vertical adjustments (2 front and 2 rear) in the ratchet style. The helmet does not have metallic components.

ACCESSORIES

- | The helmet has an adjustable chin strap and clips for glasses.
- | It has a replaceable cotton pad and a leather cover for the ratchet.
- | 180° and 360°-neck protector.

COLORS

- | Yellow, red and white.
