

WILDFIRE

5-liters drip torch

USES

It is used in direct attacks to create controlled fire lines in a comfortable and safe way. It allows the burning of long extensions without the need of replenishment. It is easy to operate thanks to the burner's design. Besides, it is possible to regulate the volume of fuel output.

DESIGN AND MATERIALS

It can be easily disassembled. Its design allows the burner to be placed inside the container making it easy and safe to transport.

It is made of aluminium painted with hydrocarbon-resistant baked polyester paint to ensure the quality of the finish and maximize protection and durability.
