

STRUCTURAL FIRE - TOOLS

8-in-1 rescue tool set

USES

- Set of tools for extrication and forced opening.

DESIGN AND MATERIALS

- The tool set includes an extendable strength handle to which seven different interchangeable types of tips are attached for the task to be performed, from tips to chisels, tin cutters or Halligan-type tips.
- The strength handle is made of steel and has a baked paint finish. Its length is adjustable to improve the lever force by means of a manually adjustable clamp.
- The different tips are made of forged, heat-treated and chrome-plated steel, which ensures a long service life. It serves different functions by changing the tips without tools, just with the manual lock.

CARRYING CASE

- The whole set is sold in an aluminum case with internal compartments for each tip or accessory.

Dimensions: 810 mm x 350 mm x 100 mm
