### USES

- The Inforest object holder is specially designed for transporting and protecting essential items such as small drip torches, flares, water bottles, among others.
- It can be used as an additional accessory to our backpacks, such as the Day Pack, or attached to the user's duty belt.

### MATERIALS

- Manufactured using 420Dx420D polyamide, a material with high mechanical resistance and a smooth surface that facilitates the sliding of dust and dirt.
- Its internal structure is composed of foam, providing protection for the stored contents.
