

## Backpack 30 L – Plan

### CHARACTERISTICS:

Backpack with a 30 L capacity, designed for transporting firefighter and brigade equipment. It includes a helmet holder, six horizontal straps, two lower load straps, two tool-holder side pockets, one handy pocket, four exterior pockets, and one main pocket.

The 4-way adjustable harness—height, waist, chest, and shoulders—secures the load against the user's back, preventing imbalance discomfort and helping reduce fatigue.

### MATERIALS

Made of polyamide (nylon) fabric with PU coating, which increases resistance to wear and abrasion while reducing weight.

Flame-retardant material compliant with NFPA 701 Standard.
