

Bowie 12"

- Tool for forest cutting and clearing work, as well as for opening access paths and facilitating crew movement.

MATERIALS:

- Manufactured in laminated steel, with heat treatment, polished and sharpened.
- Designed to withstand bending loads and impact against hard surfaces.
- Its low weight improves maneuverability.

SHEATH:

- The bowie includes an ambidextrous textile sheath, reinforced in the blade contact areas. This sheath can be secured to the user's belt or leg.

OPTIONAL

- Sharpening file included in the sheath.
