

Bowie 20"

- Tool designed for cutting and forest-clearing work, as well as for opening access paths and facilitating personnel movement.

MATERIALS:

- Made of laminated steel, heat-treated, polished and sharpened.
- Designed to withstand flexion loads and impact on hard surfaces.
- Its low weight improves maneuverability.

SHEATH

- The Bowie includes an ambidextrous textile sheath, reinforced in the blade contact areas. This sheath can be secured to the user's waist or leg.

OPTIONAL

- Sharpening file included in the sheath.
