Bullard PXS helmet

- Helmet for structural firefighting, designed to provide comfort and ease of use in extreme conditions.

DESIGN

- Heat-resistant thermoplastic shell with an aluminum-reinforced outer brim, secured at the back.
- Impact-absorbing liner system, featuring a urethane foam layer combined with a high thermal-resistance shell.
- Quick size-adjustment capability through a system attached to a heat-resistant nylon headband.

VISOR

- Flip-down eye protection shield deployable from inside the helmet.
- High heat-resistant material with anti-scratch coating on both inner and outer surfaces.
- Ergonomic nose pad.
- NFPA approved.
