

EURO XV fireproof hood

USES

- | Inherently fireproof protector made of aramid fibers which safeguards the head and the neck with its "nun" format. It protects the user against burns caused by radiant heat, flames, and flaming particles.

COMPLEMENTS

- | It can be used in combination with the helmet, respiratory protection, and eye protectors.

TEXTURE

- | It has a soft texture in contact with the skin, and does not cause irritation in the presence of sweat.

MATERIALS

- | Interlock 210g / m2
- | 50% Meta Aramid - 50% FR Lenzing
