

EURO XVI Wildland Fire Pant

FIRE-PROOF MATERIAL

- | Fire-proof Wildland Fire Pant made of inherently fire-proof fabric without treatments that can be lost by washing it.
- | All of its materials are fire-proof, from the fabric to the threads, the reflective tape, the Velcro fastenings, the front button and the automatic covered bronze zipper that prevents heat transfer from the outside to the inside of the garment, avoiding contact burns.

FABRIC

- | Fabric that is soft in contact with the skin. The fabric allows for the elimination of perspiration and body heat which, together with the colors used, decreases solar radiation absorption, reducing thermal stress factors.

REINFORCEMENTS

- | The pant has reinforcement in the areas of greater friction, such as the knees and the back part. It has triple seams with an anti-hook design which provide great resistance for any kind of movement. The reinforcements and seams are carefully designed to not interfere with the user and avoid uncomfortable points during prolonged use.

QUALITY

- | Our fire-proof EURO XVI shirts and pants are manufactured according to the Certificate issued by the AITEX Certification Body of Spain. This certificate obtained by our company guarantees the quality and performance of our fire-proof EURO XVI Wildland Fire Pants and Shirts under the ISO Standard 16073-3: 2019 "Personal Protection Equipment to Combat Wildfires," and the ISO Standard UNE-EN 15384: 2020 "Protective clothing for wildfire firefighters."

Euro XVI Wildland Fire Pant

DETAILS

POCKETS

- | It has two diagonal front pockets with flaps to prevent debris from getting inside.
- | Two cargo-type side pockets. Two back flap pockets.
- | All pockets, just as the seams, have a design that prevents them to get hooked in vegetation.

Two lateral pockets

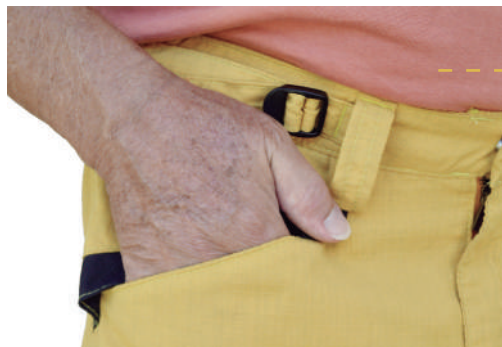

Back pocket

WAISTBAND

- | The waist is high to provide greater protection in the lumbar area. It has wide belt loops, so NATO-style belts can be used. It also has an adjustment system for a better fit to the body.

Elastic waist band with 7 belt loops.

The best waist fit in any size.

DESIGN

- | Ergonomic design with pleats in the bending sections which provide full mobility and reduce fatigue during long working days. It also has a gusset in the crotch for greater comfort, even when lifting the legs.

REFLECTIVE TAPE

- | 100% meta-aramid fire-proof reflective tapes which provide a 360° vision.

HEMS

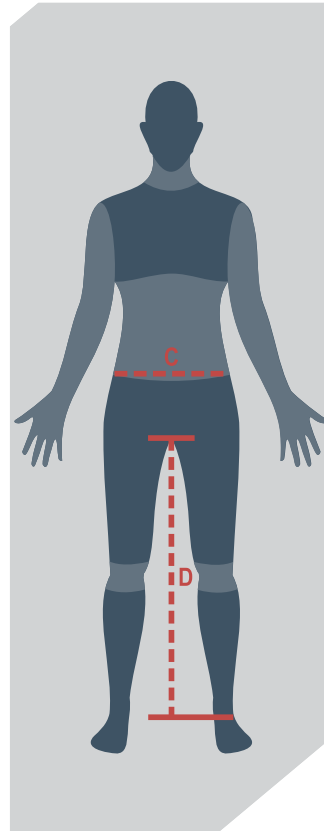

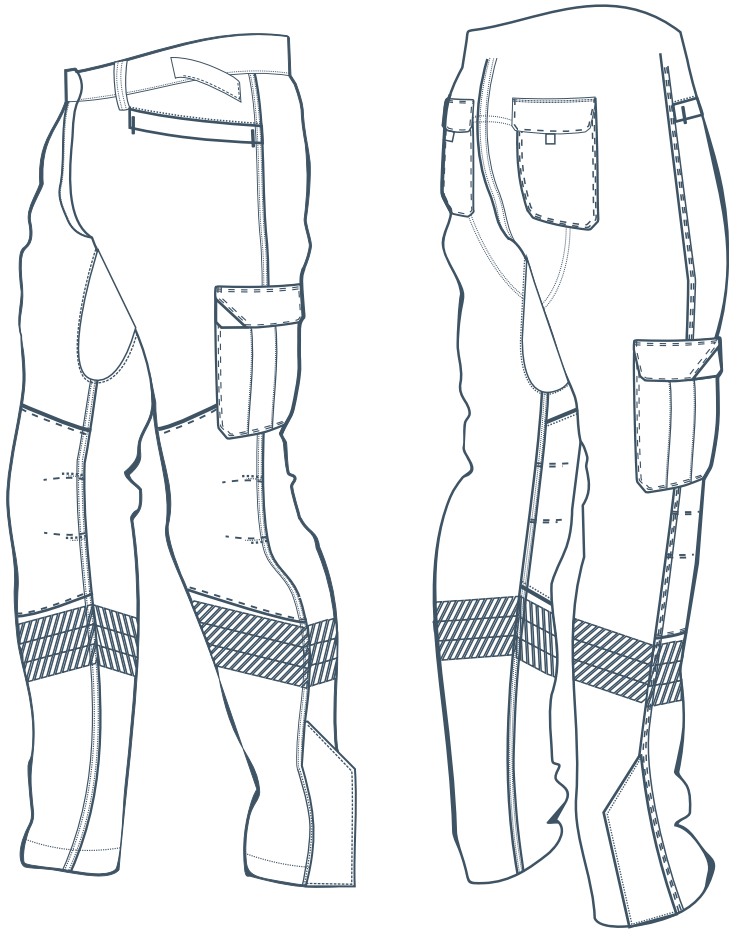

- | They have a Velcro fastening system, so they can be worn tight or loose, and their flap stays backwards to avoid snagging.

Knees with pleats: they ensure natural mobility to the leg.

Reflective Tape: Better visibility during day and night.

Sizes chart Euro XVI wildland fire pants

- Measurement C is the perimeter of the waist measured at the height of the hip bones.
- Measurement D is from the cross point to the ankle.
- Sizes not shown in the table are considered special, so they may differ in cost and delivery time.

The chart shows the measures of the body, not the ones of the garment

GARMENT	Measure/size	XS (36)	S (38/40)	M (42/44)	L (46/48)	XL (50/52)	XXL (54/56)
PANTS	C-Waist	Less than 72 cm	Between 73/80 cm	Between 81/88 cm	Between 89/96 cm	Between 97/104 cm	Between 105/122 cm
	D-Cross point length	Up to 72 cm	Up to 74 cm	Up to 76 cm	Up to 78 cm	Up to 80 cm	Up to 82 cm
