

## Extrication gloves

### USES

- | Anti-shock gloves for mechanical protection. Thermoplastic rubber reinforcement on knuckles, fingers and on the carpal bone area that protects against impact and wounds

### MATERIAL

- | Abrasion-resistant PVC on palm and three fingers that limits the penetration of liquids.
- | EVA rubber palm protector patch of 5 mm.
- | EVA rubber back protector patch of 5 mm for the metacarpal zone.
- | Adjustable neoprene cuff which makes the gloves easy to put on.

### PROTECTION AND COMFORT

- | Anti-slip palm reinforcement for a greater grip.
- | Flexible zones for high dexterity.
- | Contrasting color for better visibility of the hand.
