## Firefighter axe with fiberglass handle

### USES:

Features a cutting edge for impact cuts and a pointed end for penetrating and prying hard materials or objects.

### DESIGN AND MATERIALS:

Forged steel head, heat-treated to achieve hardness (50–55 RC) on the outer cutting zone. This process maintains internal ductility, along with the ductility of the eye section where the fiberglass handle is inserted, minimizing vibration transfer when striking.

### HANDLE:

Fiberglass handle.

Rubber grip.

Dielectric insulation rated to 50,000 volts.

### TECHNICAL SPECIFICATIONS:

Weight	4kg
Length	900 mm.
