

WILDFIRE

# Inforest nozzle 366

## USES

- | It is a 1.5" nozzle with cut and adjustable flow which has 4 different flow options. It achieves greater effectiveness by preserving the available water and avoiding breakage due to jet impact.
- | It combines from a fog to a full jet with only a quarter turn of the nozzle. It is designed to withstand pressure up to 40 BAR, making it optimal for use in lines and winders.

## CONSTRUCTION

- | It is made of anodized aluminum. It allows the application of AFFF-type foam. It requires minimum maintenance, since the shut-off valve and the rotating teeth are made of stainless steel and all the components are corrosion resistant.

## INLET

- | 1.5" (38 mm)
- | Selectable flows: 115-230-360-475 LPM
