

Multi-purpose hatchet

USES

- It is a personal use tool for structure fire or rescue tasks. It integrates 3 main functions: a straight-bit axe, a pick with a pointed end, and a crowbar to force entrance or to open fire hydrants.
- It is a practical and easy-to-handle object ideal for work in confined spaces.

DESIGN AND MATERIALS

- In the upper area, it has a slot to use the tool as a lever in the opening and closing of valves, and to force open padlocks and other obstacles in the fire.
- The body is made of steel hardened through heat treatment. It has a grip in the handle that absorbs vibration.
- A baked paint finish ensures the product's durability.
