

## Splithammer Axe with fiberglass handle

QR: Use your camera or bar code scanner and download the digital PDF version

It is an ideal tool for cutting, opening, and striking effectively.

### MATERIALS:

The axe head is made of forged steel and is heat-treated to provide hardness in the blade area (50–55 RC) while maintaining ductility in the eye section where the handle is inserted (30–35 RC).

The head includes a wedge and, on the opposite end, can be used as a striking hammer.

WEIGHT:	3,9 kg
LENGTH:	900 mm
HANDLE:	Fiberglass with rubber grip. Dielectric insulation 50,000 volts.
MATERIAL	1045 steel.
