

Foldable tank

USES

- | Open foldable tanks are easy to assemble and transport. They are used to store water for supply or direct combat in remote, hard-to-reach areas where there are not many replenishment options.
- | The tanks make it possible to have large volumes of water available without depending on tank trucks, or where there is a low volume of replacement. It even allows firefighters to work in an interconnected way during structural fire-fighting operations, being a source of supply for all fire trucks.

MATERIALS AND COMPLEMENTS

- | They are built with an aluminum structure with hinges that allow folding. It has a liner made of PVC-coated polyester fabric.
- | They can be assembled with the necessary connections to connect motor-pumps for loading or unloading. Besides, thanks to its top mouth feature, it allows Bambi Buckets to be recharged.
- | Open tanks can be replenished with any type of mobile tank or cistern, providing autonomy of work.

CAPACITY

- | The tanks can have a storage capacity ranging from 1,000 to 10,000 liters.
