

EOM helmet

The EOM helmet features an excellent head protection system for forest firefighting, technical rescue, height rescue, and torrential water rescue.

DESIGN

- The outer shell has reinforcing grooves with rounded edges and is equipped with a special ventilation system, protected by a steel net against debris, which can be closed with a slider placed on its upper part.
- On the inside, it has a lining made of breathable anti-sweat material.
- It has a quick-adjusting chin strap with a self-adjusting anti-slip system.

MATERIALS

- Outer shell: Glass fiber reinforced thermoplastic.
- Inner shell: Breathable anti-sweat material.

TECHNICAL SPECIFICATIONS

Helmet weight	750 g ± 10 g
Helmet weight with safety glasses	900 g ± 10 g
