

Technical vest

This garment is intended to be used in the field by surveyors, fire professionals, and technicians.

DESIGN

- | It is made of two layers of fabric. It has a zipper on the front that is covered by a storm flap. The waist area can be adjusted with buckles.
- | At the front, it has four flap pockets, and two Napoleon-type pockets at the top. It features a hand pocket on each side. On the back there is a multifunctional pocket.
- | It also has Velcro straps on the top to carry radios and straps to hang items at the waist.
- | The front and back sides have a reflective tape that allows for quick identification of the user during the day and at night.

MATERIALS

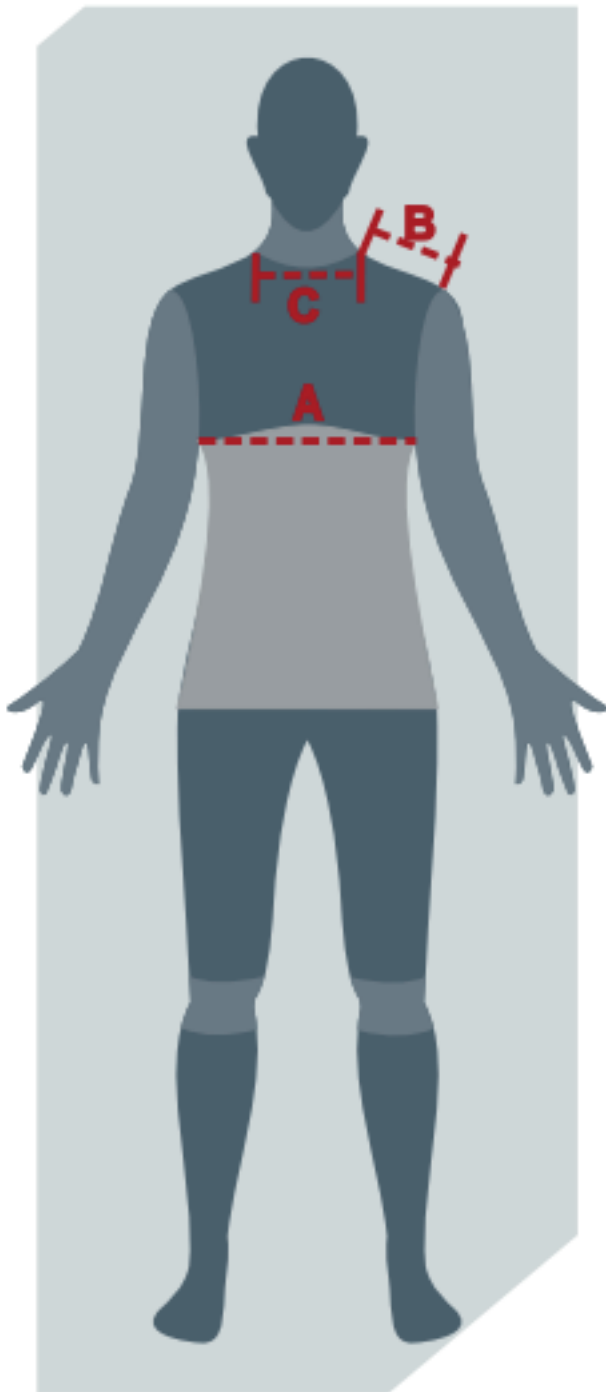

- | Gabardine 100% cotton

CUSTOMIZATION

- | This garment can be customized by adding a logo or text on the upper left pocket and text on the upper part of the back.
