

EURO XV firefighter footwear

USES

- | Glued and stitched abrasion-resistant rubber soles with thermal insulation and heat resistance which provides great flexibility and a firm grip to walk and climb on steep terrain.

DESIGN AND MATERIALS

- | They are made of top-quality leather and padded with high density foam. They have thermoplastic toe caps, metal pieces, and eyelets of superior quality.
- | Sole insoles with rivets for reinforcement of the shaft to the upper.
- | Sole insole.
- | Rubber soles with sewn panel in all their contour. Soles are reinforced with a triple seam.
