

Euro XV firefighter footwear

USES

Firefighting boots with thermal insulation.

DESIGN AND MATERIALS

Biodensity rubber sole, glued and stitched, abrasion-resistant.

The sole provides thermal insulation and offers flexibility and grip, allowing the footwear to be used on different terrains for walking or climbing.

Constructed in leather, padded with high-density foam.

Thermoplastic toe cap and heel counter with thermo-formed reinforcement fabric.

Insole.

Rubber sole with stitched welt around the entire perimeter, with a triple-stitch reinforcement on the insole.
