

# Mapache extinguishing Backpack

The most ergonomic water backpack on the market. Its new square design helps it maintain its shape during and after filling. It is comfortable for working long days and walking long distances effortlessly. Our new design has several adjustments; it distributes weight better and adapts to all users.

The outer backpack, which functions as a containment structure, is made of polyamide fabric (Nylon) with PU coating, which increases resistance to wear and abrasion, reduces weight, and adds a fundamental characteristic: a flame-retardant property in accordance with the NFPA 701 Standard.

It contains a water bag inside with a breakwater for better containment. This bag is made of very resistant PVC, and can be easily replaced without tools in case of punctures. It has a filling mouth at the top with a filter and handles to keep it in a horizontal position when filling it.

## POCKETS:

At the front part it has a pocket with a zipper, which opens at the top. In the lower part it has fastenings that attach it to the backpack. The pockets can be used to hold various elements, as they detach from the body of the backpack and have an adjustment system at the top.

MOLLE system for the incorporation of accessories or tools, and two flap side pockets for carrying torches or water bottles.

- 3 adjustable fastening systems: abdominal belt, chest belt, and adjustable shoulder straps.
- Stainless-steel double-action nozzle
- Bronze quick coupling

Dimensions	Full	Empty
Height	600 mm	600 mm
