

Fireflyer Helicopter Water Tank

Aerodynamic PVC tank for helicopter transport.

USES:

Aerial transport of water, firefighting foam, and potable water to remote areas by helicopter, for wildland firefighting and emergency operations.

DESIGN AND MATERIALS

Made of high-strength PVC-coated fabric

Flexible, compact container

100 mm (4 in) fill opening

Shut-off valve at the outlet

Hose with standard G.T.H. connection and O-ring for secure coupling

Pear-shaped ring designed to withstand rotation caused by wind during aerial transport

WEIGHT AND DIMENSIONS

MODEL: FP60	
Capacity	72 U.S. Gal / 273 L
Full weight	612 lb / 278 Kg
Empty weight	13.0 lb / 5.9 kg

MODEL: FP110	
Capacity	132 U.S. Gal / 500 L
Full weight	1115 lb / 507 Kg
Empty weight	17.0 lb / 7.7 kg
