

Inforest Nozzle 560 High-Pressure Trigger Nozzle

USES:

Wildland firefighting and fire control operations, for tasks requiring a high-pressure jet with immediate flow shut-off via trigger.

DESIGN AND MATERIALS

- Pistol-style design with ergonomic grip and shut-off trigger
- High-strength alloy construction
- A system of rotating teeth made of stainless steel for jet generation
- Suitable for high pressure (PN40)
- Components engineered for continuous operation and intensive use
- Enhanced durability and wear resistance
- Inlet: 1 in (25 mm) BSP
- Selectable flow rates: 19, 37, 90, 150 LPM
